SISTEMAX

UAB „Sistemax“ designs and manufactures verandas for various purposes. Whether you need to protect yourself from the summer heat, winter blizzards, or rain, Sistemax is always ready to help you at all times of the year and in all cases.

Verandas designed by our specialists according to the individual needs of each customer, even the most demanding, are an integral part of the cozy environment of every house, and a better quality of life for its residents.

We can offer various solutions for the glazing, depending on the purpose of the veranda, specific practical needs and the individual aesthetic taste of each customer.

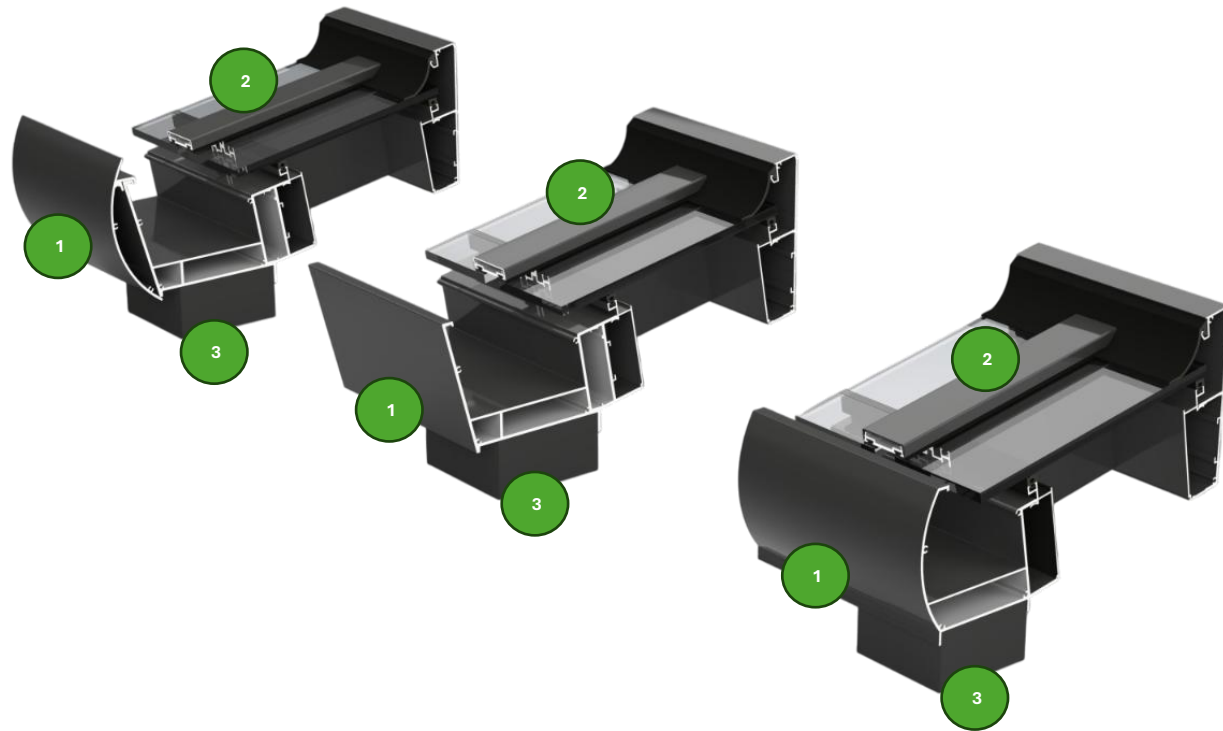

- Stationary glass walls are one of the simplest solutions
- Sliding windows with frames - very convenient to open
- Sliding windows without frames
- Aluminium walls
- Opening constructions

Check out the brochure and immerse yourself in the endless possibilities!

Create a space close to nature with Sistemax!

- ✓ Two standart colors (RAL7016, RAL8017)
- ✓ Integrated rain drainage system
- ✓ Minimal maintenance and reliable materials
- ✓ A gutter profile to match the style of your home
- ✓ Glass or polycarbonate roofing

Use of solar modules instead of glass or polycarbonate roofing

Frameless solar modules can be used. They are installed in place of glass or polycarbonate sheets, so no additional fasteners are required. All this becomes cheaper than installing solar modules separately on top of the structure.

Aluminum profile railing "SMART" with glass
